A HUMAN PROBLEM

She became a therapist to help people.

Paperwork is getting in the way.

The work she loves is on the other side of the paperwork.

PRIVACY

AI could help. Confidentiality changes everything.

AI-using small businesses name trust and reliability as real concerns.

AI-RELATED CONCERNS

Source: SBE Council · Small Business Technology Use Survey (Mar 2026), p. 38

Q20: n=425 AI-tool users; overall survey n=517 owners, 2–99 employees; Feb 17–23, 2026.

For therapy, privacy is a condition of care.

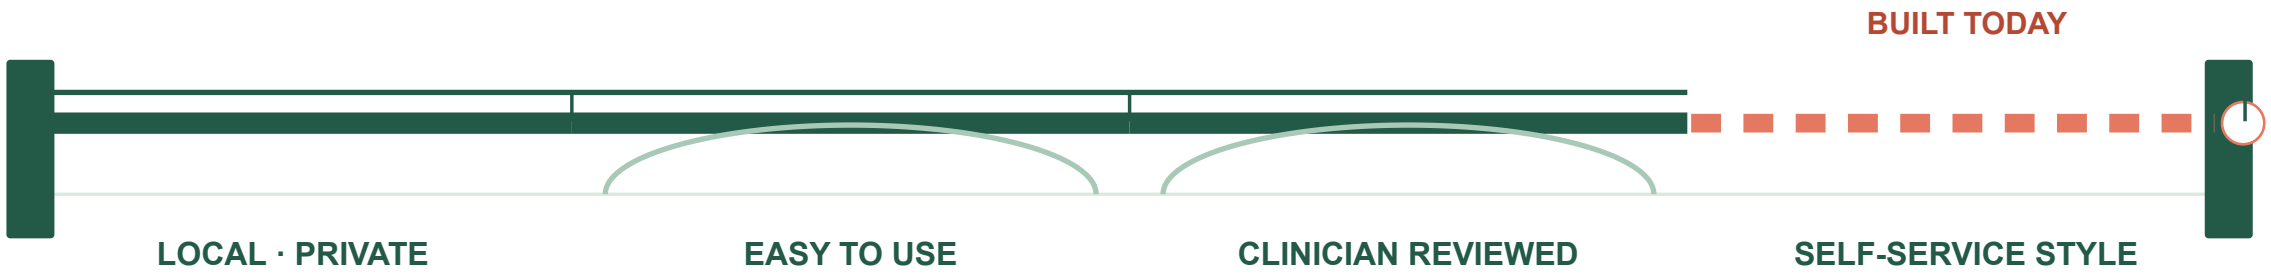

Local processing keeps the session on the clinician's terms.

THE GAP

Local AI exists. Making it useful is the gap.

Scribular
LOCAL AI · CLINICIAN-LED

Scribular turns a private transcript into a draft note—and lets clinicians shape the result themselves.

Scribular today: transcript → draft note

Built today: customize in plain language

Today: the final segment, in the clinician's own words.

LIVE PRODUCT WALKTHROUGH

DEMO

Transcript → draft → request → review → preview → save

A clinician stays in control at every step.

THE OUTCOME

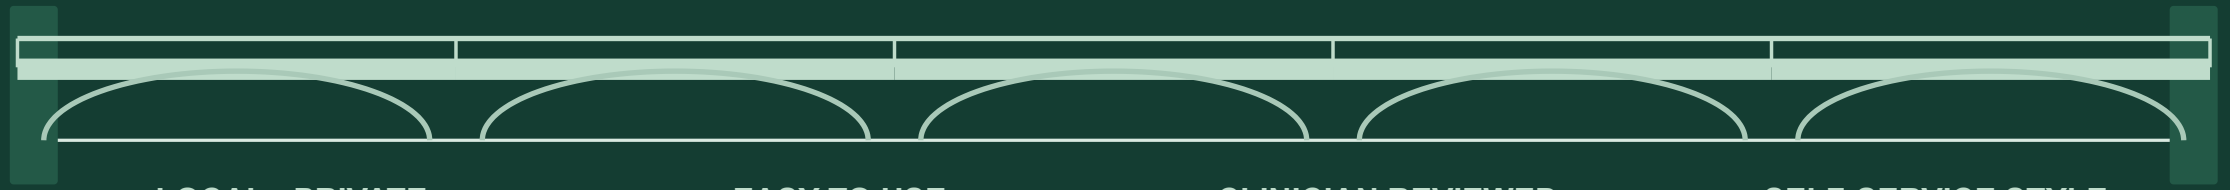

Back to what she loves.

From a model that runs to a tool a therapist can use.

5+ hours
/ week

$3,000
/ month

ILLUSTRATIVE GOAL

More time with clients.

Illustrative value of time: 5 hrs/week × 4 weeks × $150/hr = $3,000/month. Not cash savings; estimate is unvalidated and not a measured Scribular result.
